

How to use the TMK Map of Hawaii - "The Big Island"

The Tax Map Key (TMK Map) shows the Big Island (County of Hawaii) in nine zones, and is used by Realtors, escrow companies, financial institutions and the government to designate the exact location of a property. All legal documents refer to the TMK number.

Using this TMK map you can determine the approximate location of the properties listed in this magazine. The TMK number in the property description has five digits:

3 - 7 - 7 - 16 - 48
County - Zone - Section - Plat - Parcel

The first digit refers to the county, this map is of Hawaii County "The Big Island" and is designated by the number 3.

The second digit refers to the zone, indicated on this map by the large numbers surrounding the map.

The third digit refers to a section within the zone, indicated on this map by the small numbers within the map.

The fourth and fifth numbers (not indicated on this map) refer to the plat and parcel, which designate the exact location of the property on a detailed tax map.

Guide to Cities & Towns

AREA	ZONE	SECTION	AREA	ZONE	SECTION
